

The background of the entire graphic is a photograph of a dense forest. Sunlight filters through the trees, creating a misty or ethereal atmosphere. A solid green horizontal banner is centered across the middle of the image, containing the main text.

Celebrate Earth Day with Skagit Land Trust!

Why?

- Help Skagit Land Trust create species lists for Trust properties
- Contribute to the large data set gathered by amateur naturalists from around the world
- Fun activity that can be done with family & friends
- Learn more about nature in Skagit County

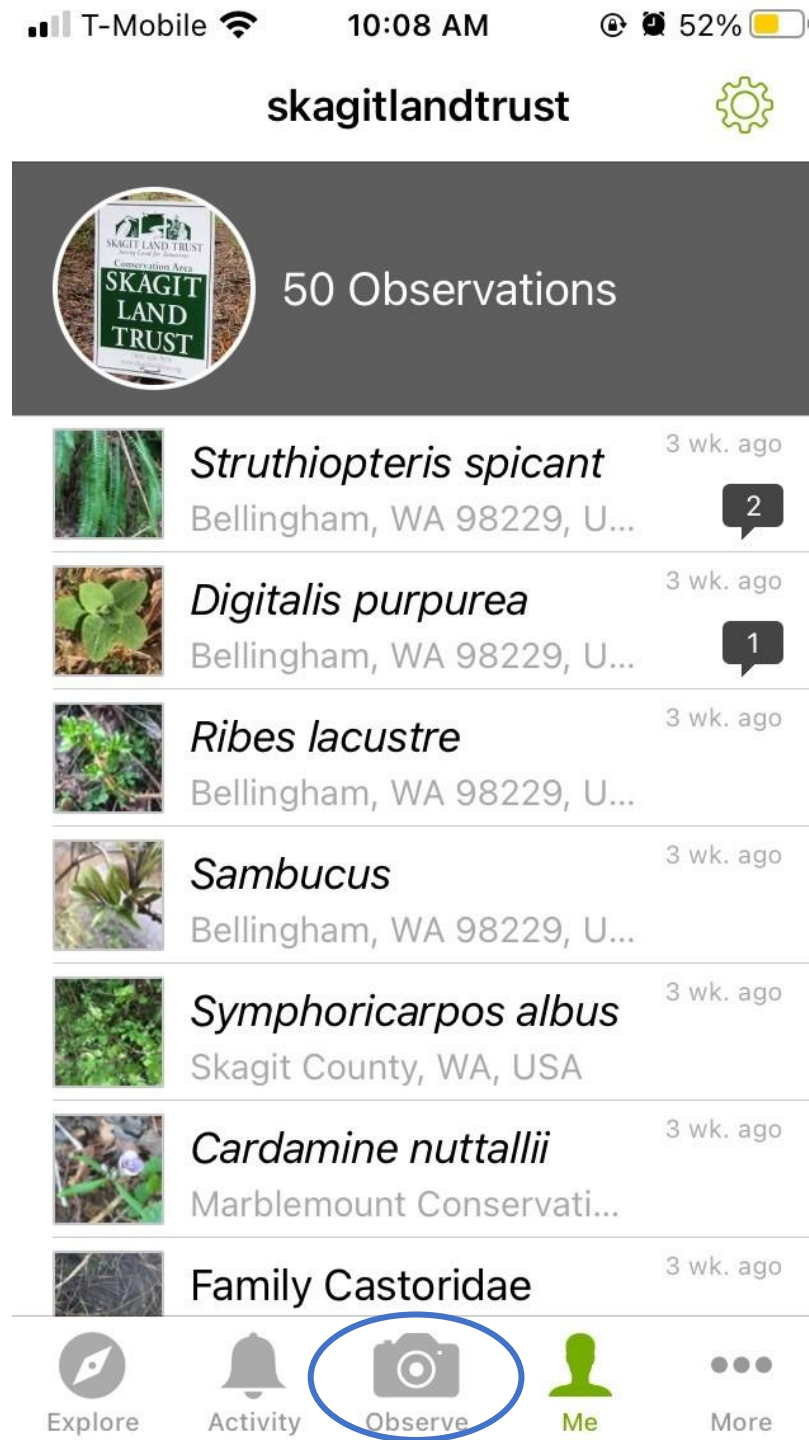

How?

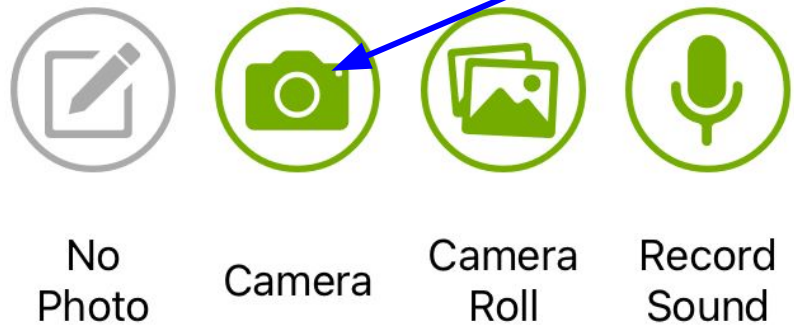

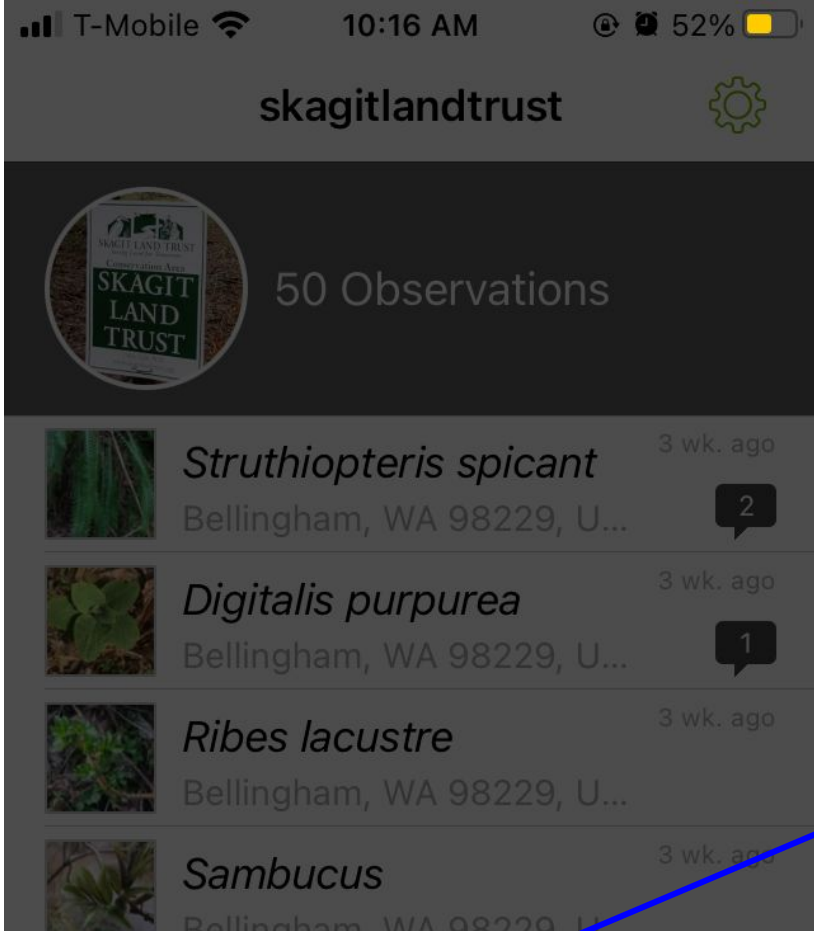

- Iphone
- Android
- Camera/Computer

The screenshot shows the 'Details' screen of the iNaturalist app. It includes a photo gallery at the top, a 'What did you see?' section with a search bar, a 'Notes...' section, and a bottom section with fields for date, location, and other metadata. A green 'Save' button is at the bottom. Numbered callouts (1-6) point to specific features: 1 points to the photo gallery, 2 to the 'What did you see?' search bar, 3 to the 'Notes...' section, 4 to the date field, 5 to the location field, and 6 to the 'Save' button. An orange callout box at the top right explains the search bar: 'Choose one of the computer vision suggestions, search for something else, or type in a 'Placeholder' if offline'. Another orange callout box at the bottom right explains the location field: 'The app should fetch your location automatically and display it on the map. If it doesn't, go to the Settings app and tap Privacy to enable Location Services for iNaturalist'. A third orange callout box at the bottom left explains the 'Save' button: 'Observations are automatically counted by collection projects and can't be added manually'.

Agree?

Temporary limitations on places and taxon changes

In preparation for increased iNaturalist activity later this month during the City Nature Challenge, starting on April 26 we will temporarily restrict some features until May 10.

Utopia Conservation Area Ecological Survey

Utopia Conservation Area Ecological Survey

About

Members  1

Join us at Utopia Conservation Area! Although there isn't currently a developed trail through this 88-acre property, one of our kind neighbors keeps a path mowed to the Skagit River which is .6 miles from the gate. Follow the trail across Wiseman Creek and through several areas of restoration plantings. Follow the link for directions

Tope Ryan Conservation Area Ecological Survey

About

Join us at Tope Ryan Conservation Area! The Tope Ryan Conservation Area property protects over 20 acres of former agricultural land including 900 feet of shoreline along the Samish River north of Burlington. The property also contains native riparian forest and several acres of pasture. This is a great property for wildflowers and birds!
